

## Hosted Exchange

We strive to not only present your business with options, but also to ensure those options are right for your situation. Our Hosted Exchange service is a great tool for business owners who want to run their business and not manage their internal mail server.

But, we recognize that many of your users only need a reliable connection to their email in order to keep your business connected and efficient. Regardless of your specific needs, all of our Hosted Exchange solutions include the best spam and malware filter in the business and a free trial with no obligation.
