EMAIL ENCRYPTION

for the Financial Industry

# If you're in the financial industry, **email encryption** has to be a part of your portfolio.

With increasing pressure to safeguard customer data in an environment of growing regulatory oversight and increased information security risks, anyone working in the financial industry has to continually protect data to build customer trust. Because without the trust of your customers, you're out of business.

By successfully incorporating encryption into email communications, your business can differentiate itself in the marketplace with a superior client experience, increased worker productivity and reduced expenses.

# CipherPost Pro is the Solution

CipherPost Pro is much more than traditional encryption – it's an information management tool that enables businesses in the financial industry to easily protect and control access to their email, even after content has left the outbox. In this age of instant worldwide communications, CipherPost Pro is a critical tool for any business that needs to protect its virtual vault of information with the same rigor it utilizes to protect its physical location.

CipherPost Pro seamlessly integrates into any third-party email infrastructure and/or archiving system. The financial industry appreciates the ease-of-use and the intuitive interface, which helps to ease business-wide adoption of the encryption service. If your business is required to comply with the standards imposed by Sarbanes-Oxley, FINRA, Gramm-Leach-Bliley Act or others, CipherPost Pro is the solution.

# Key Features

- **Simplified Secure Communications Exchange** allows messages to be securely sent, received and tracked on any device.
- **Data Loss Prevention** works with any existing data leak engine and offers message content scanning and restriction based on your policies and regulations.
- **Large File Transfer** lets both sender and receiver quickly and securely share attachments of up to 5GB through email without overloading inboxes.
- **Regulatory Compliance, Electronic Tracking and Discovery** supports privacy and security regulations and offers a message Delivery Slip, as well as tracking and discovery logs that show every step of your message from composition and beyond.
- **Customized and Brandable Secure Environment** gives your business a tailored professional interface that's completely secure and easily utilized with existing email environments.

# Value Added for the Financial Industry

## **Controlled Communications and Proof of Receipt**

Lets you delete or recall sent messages, as well as control every aspect of each message, including who is able to read it and when the message was read.

## **Data Jurisdiction**

Allows your business to choose in which country their data is hosted to avoid privacy risks imposed by international laws.

## **Integrates with Existing Archiving Solutions**

Ensures that messages are easily and automatically backed up with your existing archiving solution.

## **Cost Effective with Zero Maintenance on all Devices**

Utilizes the power and convenience of the cloud in a scalable service that's easy to implement and maintain, while securely sending and receiving secure messages from any smartphone, tablet or computer.
