

for Government

Government agencies are among the fastest adopters of email encryption.

With increasing pressure to safeguard citizen data in an environment of growing regulatory oversight and increased information security risks, agencies must act quickly to avoid becoming the next news story about poor oversight.

By successfully incorporating encryption into email communications, agencies can build better relationships with the public, increase internal efficiencies and establish a reputation of trust.

CipherPost Pro is the Solution

CipherPost Pro is much more than traditional encryption – it's an information management tool that enables government agencies to easily protect and control access to their email even after content has left the outbox. In this age of heightened awareness of data security issues, CipherPost Pro is a critical tool for government agencies looking to communicate more efficiently and effectively with their citizens and better serve their needs.

CipherPost Pro seamlessly integrates into any third-party email infrastructure and/or archiving system. Government agencies appreciate the ease-of-use and the intuitive interface, which helps to ease agency-wide adoption of the encryption service.

Key Features

- **Simplified Secure Communications Exchange** allows messages to be securely sent, received and tracked on any device.
- **Data Loss Prevention** works with any existing data leak engine and offers message content scanning and restriction based on your policies and regulations.
- **Large File Transfer** lets both sender and receiver quickly and securely share attachments of up to 5GB through email without overloading inboxes.
- **Regulatory Compliance, Electronic Tracking and Discovery** supports privacy and security regulations and offers a message Delivery Slip, as well as tracking and discovery logs that show every step of your message from composition and beyond.
- **Customized and Brandable Secure Environment** gives your agency a tailored interface that's completely secure and easily utilized with existing email environments.

Value Added for your Agency

Controlled Communications and Proof of Receipt

Lets you delete or recall sent messages, as well as control every aspect of each message, including who is able to read it and when the message was read.

Data Jurisdiction

Allows agencies to choose in which country their data is hosted to avoid privacy risks imposed by international laws.

Integrates with Existing Archiving Solutions

Ensures that messages are easily and automatically backed up with your existing archiving solution.

Cost Effective with Zero Maintenance on all Devices

Utilizes the power and convenience of the cloud in a scalable service that's easy to implement and maintain, while securely sending and receiving secure messages from any smartphone, tablet or computer.
