

Mailbox Filtering Options:

AppRiver Email Security and Office 365

While it's nice to have options, sometimes what you're really trying to outrun is all of that unwanted spam and malware that clogs your inbox and infiltrates your email server – and keeps your infrastructure from doing what you need it to do: your business. So, trust us when we say that our spam and virus filter means business. But even if you're already relying on Office 365 for your mailboxes, it's highly possible that

your business and users need more customization than the standard Microsoft Exchange Online Protection (EOP) provides. In this case, consider augmenting your Office 365 solution with AppRiver's Email Security phishing and malware protection to truly attack unwanted emails from every angle. Take a look at the filtering comparisons and differentiators between the two solutions:

	Email Security	Office 365 EOP
Designed to augment any cloud-based or on-premise email solution	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Capture rate	99%	99%
Filters both inbound and outbound mail	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
URL link checking	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Spoofing Prevention with industry-accepted, sender verification standards	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Impersonation Protection Technology	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Advanced Phish Finder Threat Intelligence Technology that identifies and addresses brand-spoofing attacks	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Bulk Policy Management	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Email continuity provisions in case of email server/service outage	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Daily Held Spam Report of all quarantined items per individual mailbox	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Consistent settings, regardless of platform (i.e. Windows, Mac, etc.)	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Simplified web-based interface to easily change settings per domain or end-user	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
User-friendly settings for allowing or blocking email addresses and/or domains even for non-technical end-users	<input checked="" type="checkbox"/>	<input type="checkbox"/>
24/7/365 support available instantly through phone, email or chat	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
